

## **SEC Awarded RoPSA Order of Distinction 2009.**

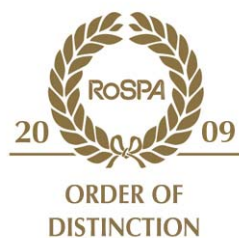

**Southern Electric Contracting (SEC)'s specialist Electrical and Instrumentation business has been awarded an Order of Distinction by RoSPA.**

The consistently high performance of SEC E&I was recognised by the Order of Distinction Award - an accolade only given to organisations achieving fifteen consecutive Gold Awards. This performance is particularly notable as the majority of the E&I work is carried out in extremely hazardous environments.

The company as a whole was presented with a Gold Award, reflecting the very high standards of health and safety maintained by SEC.

The RoSPA Awards scheme, one of the most highly respected occupational award programmes in the UK, was set up to recognise organisations contributing to raising health and safety standards through hard work to improve their own performance.

The award ceremony will be held at the Birmingham Hilton Metropole Hotel, at the National Exhibition Centre on 13th May 2009 and will take place alongside Safety & Health Expo 2009, Europe's leading health & safety exhibition.
